SEA FREIGHT

Whatever your cargo volume, we can efficiently pick up and deliver the goods you need from any major port worldwide with the many carriers we work with.

For maritime transport, it is important to have detailed knowledge of local and international export and import compliance.

At F&F Transport, we have experienced staff to help you understand each country's requirements and local pickup and last-mile delivery. We can handle it if you need logistical support or warehouse management for your supply chain.

In addition to having the flexibility to send your cargo at the most convenient time, we can provide individualized service with the appropriate shipping, routes, and cost-effectiveness thanks to our agreements with global and regional shipping carriers.

AIR FREIGHT

Our air freight services include:

- Door to door
- Airport to airport
- Air chartering
- Sea-air combined service
- Perishable and DG handling

Air transport services are the most valuable for moving express shipments around the globe.

F&F Transport facilitates moving goods across distances and borders in conformity with the complexities of domestic and international regulations, security and safety requirements, borders, and tax regimes.

It offers a comprehensive air logistics solution, including express and door-to-door shipment service.

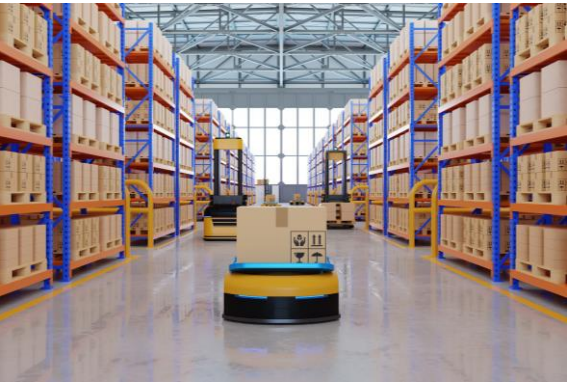
CUSTOMS BROKERAGE

Customs clearance is one of the very important stage in the export/import of goods, the Customs declaration requires the flexibility of experienced staff to handle the problems that arise quickly and professionally. To meet customer demand, customs brokerage services of our company has contributed in no small part to promote strong growth of the company.

Depending on each different type of clearance, we ensure the stage is done safely and fastest (from the opening stages of the contract until the liquidity contract, from sewing machines to catalog imported equipment, materials scheduling imports, set the profile import declaration, setting norms and established the export declaration documents).

WAREHOUSING SOLUTION



F&F Transport provides third party warehousing service options for our customers. Our services include cross docking, stuffing and destuffing, purchase order segregation, short and long-term storage of bulk and racked cargo with specialized handling capabilities, Bar Coding, Distribution Services.

Whatever your warehousing needs, F&F Transport can recommend a realistic and cost effective solution to cover your requirement.

INLAND TRANSPORTATION

Together, we decide which modalities are the best for routing and shipment and solve if an unexpected waiting time occurs.

With intermodal transportation, we ensure the uninterrupted operation of the process by finalizing the smooth transfer of your oversized cargo between trucks, trains, and cargo ships.

Besides, internal transportation coordination is safer for your business without involving third parties, allowing a short transit time. That's why we've added inland transportation to our logistics services.

SEA-AIR COMBINED

At first look, it may seem unlikely that this joint transportation mode approach which we refer to as Sea-Air would be of benefit to most importers, but it turns out that there are many situations when shippers and importers are able to take advantage of this out-of-norm transportation tactic.

When shippers want a more cost effective option than air freight alone but a quicker one than ocean freight alone, this unlikely combination does the trick. Many business owners have been using this type of service to help them meet tight delivery deadlines and at the same time save significantly on shipping costs as well.

With this approach, the cargo is typically initially transported by ocean and later by air. For more information, assistance, or to determine if this blended method of transport can be a good option for your business, please contact our specialized staff at F&F Transport. We will be happy to develop the most appropriate and cost effective solutions for your specific situation.
